Department of Geology, University of Texas at Arlington

**Paleomap Project Technical Report no. 10-90-1, published in conjunction with
the 1990 GSA Short Course on "Phanerozoic Plate Tectonic Reconstructions"**

Preface

This Atlas of Phanerozoic Plate Tectonic Reconstructions is the first compilation of maps to be published by the PALEOMAP Project of the International Lithosphere Program. This atlas is a preliminary version of a large format atlas that will be published in mid 1991 by the American Geophysical Union.

The Mesozoic and Cenozoic plate tectonic reconstructions are based on the work of the Paleooceanographic Mapping Project (Univ. Texas Institute for Geophysics, Technical Report 90, 1987) in combination with the tectonic model of Asia by David Rowley (U. Chicago). The Paleozoic plate tectonic reconstructions are modified after Scotese and McKerrow (1990). These modifications included minor changes in the Ordovician reconstructions and major revisions of the Cambrian and latest Precambrian maps (Scotese et al., in prep.).

C. R. Scotese is solely responsible for the inferred location of active plate boundaries shown on the maps.

Contents

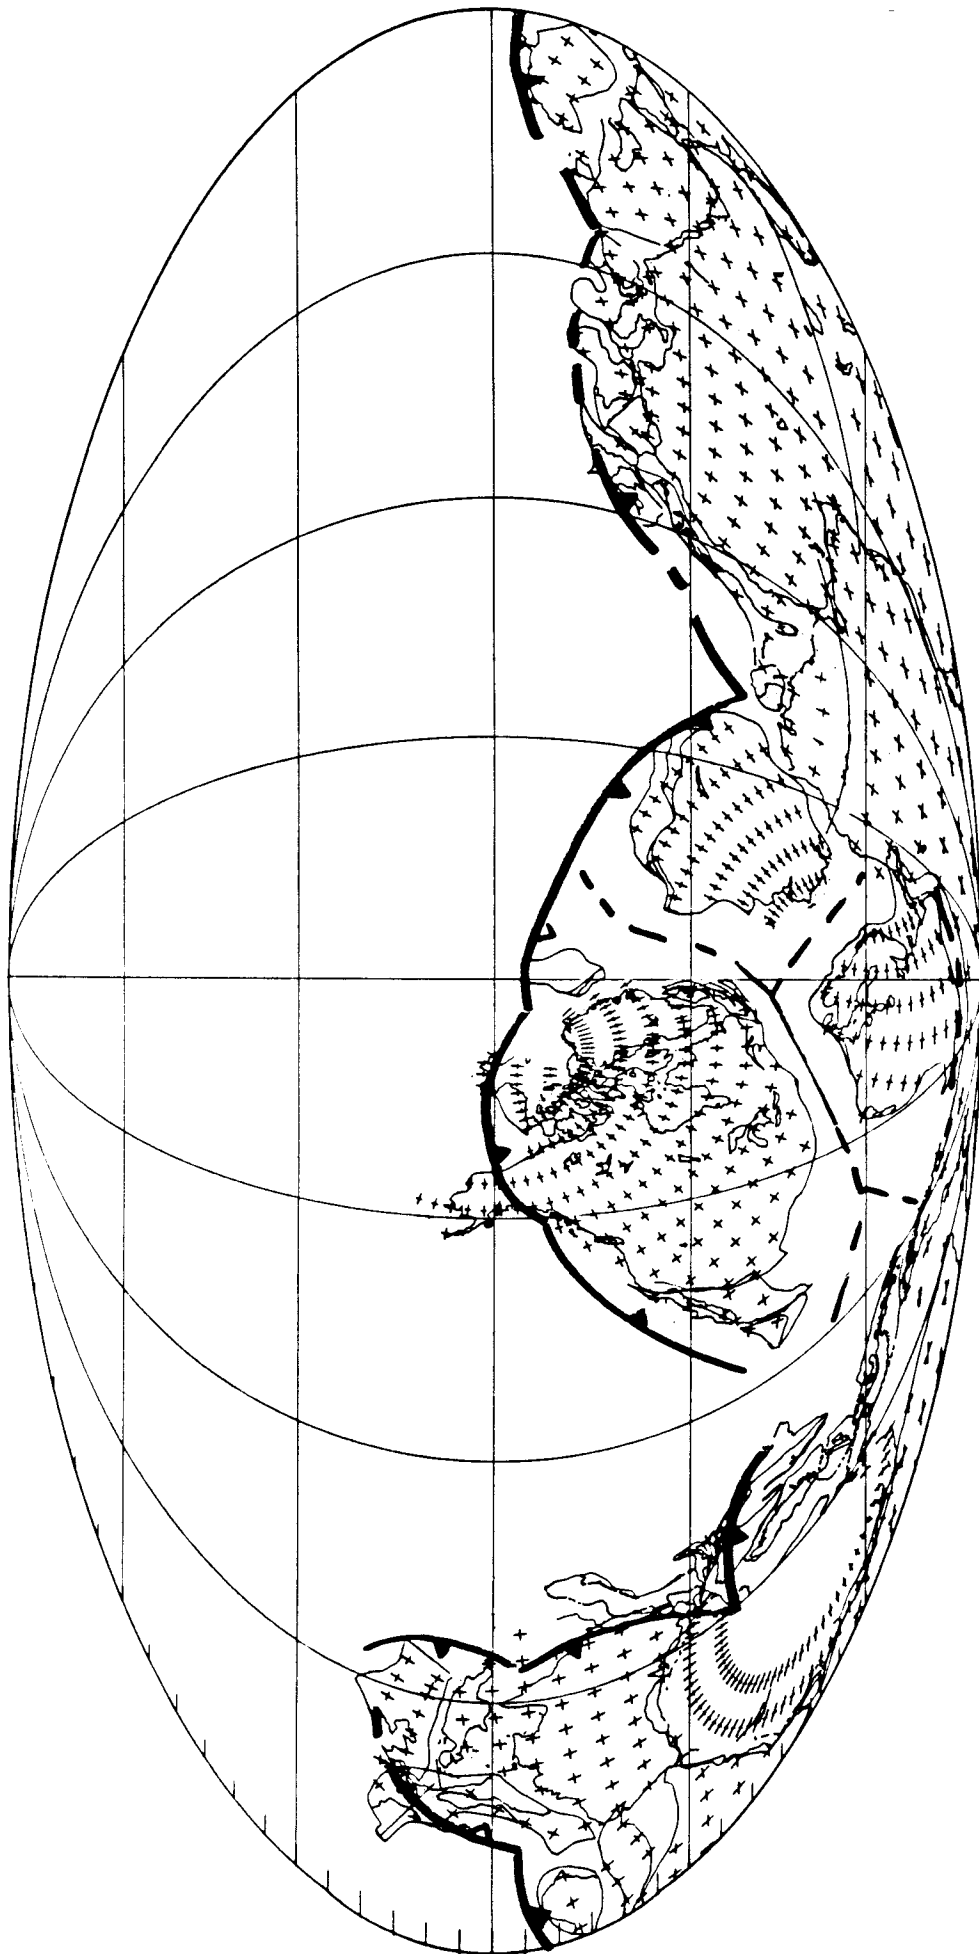

- Figure 1. Global Suture Map
- Figure 2. Present-Day A1
- Figure 3. Pleistocene 1.9 Ma A2
- Figure 4. Early Pliocene 4.8 Ma A3
- Figure 5. Late Miocene (Sarmatian) 10.6 Ma A5
- Figure 6. Middle Miocene (Vindobonian) 14.0 Ma
- Figure 7. Early Miocene (Girondian) 20.5 Ma A6
- Figure 8. Late Oligocene (Chattian) 27.7 Ma A8
- Figure 9. Earliest Oligocene (Rupelian) 35.9 Ma A13
- Figure 10. Late Eocene (Bartonian) 42.7 Ma A18
- Figure 11. Middle Eocene (Lutetian) 50.3 Ma A21
- Figure 12. Early Eocene (Ypresian) 56.1 Ma A24
- Figure 13. Late Paleocene (Thanetian) 59.2 Ma A25
- Figure 14. Early Paleocene (Danian) 65.1 Ma A28
- Figure 15. Latest Cretaceous (Maestrichtian) 69.4 Ma A31
- Figure 16. Late Cretaceous (Campanian) 80.2 Ma A33
- Figure 17. Late Cretaceous (Santonian) 84.0 Ma A34
- Figure 18. Late Cretaceous (Coniacian) 88.0 Ma
- Figure 19. Late Cretaceous (Cenomanian) 94.0 Ma
- Figure 20. Early Cretaceous (Albian) 100.0 Ma
- Figure 21. Early Cretaceous (Aptian) 118.7 Ma M0
- Figure 22. Early Cretaceous (late Hauterivian) 126.5 Ma M4
- Figure 23. Early Cretaceous (Valanginian) 130.2 Ma M11
- Figure 24. Earliest Cretaceous (Berriasian) 143.8 Ma M17
- Figure 25. Latest Jurassic (Tithonian) 152.2 Ma M21
- Figure 26. Late Jurassic (Oxfordian) 160.3 Ma M29
- Figure 27. Middle Jurassic (Callovian) 166 Ma
- Figure 28. Middle Jurassic (Bajocian) 180. Ma
- Figure 29. Early Jurassic (Pliensbachian) 195. Ma
- Figure 30. Late Triassic (Norian) 216. Ma
- Figure 31. Middle Triassic (Ladinian) 232 Ma
- Figure 32. Earliest Triassic (Induan) 242. Ma
- Figure 33. Late Permian (Kazanian) 255 Ma

- Figure 34. Early Permian (Artinskian) 277 Ma
- Figure 35. Late Carboniferous (Westphalian) 306 Ma
- Figure 36. Early Carboniferous (Visean) 342. Ma
- Figure 37. Late Devonian (Famennian) 363 Ma
- Figure 38. Early Devonian (Emsian) 390 Ma
- Figure 39. Earliest Devonian (Gedinnian) 404 Ma
- Figure 40. Late Silurian (Ludlow) 418 Ma
- Figure 41. Middle Silurian (Wenlock) 425 Ma
- Figure 42. Early Silurian (Llandovery) 433 Ma
- Figure 43. Latest Ordovician (Ashgill) 443 Ma
