" Geophysical Research at the Univ. of Port Harcourt: Where We Are and Where We Are Going"

BY

J. O. Ebeniro
Professor

Department of Physics
University of Port Harcourt
Nigeria

When: Friday, October 5, 2007, 11:00 AM

Where: J.J. Pickle Research Campus, Bldg. 196, Rm 1.603

Host: Patty Ganey-Curry, UTIG

Late 2006, The University of Port Harcourt signed a linkage agreement with the University of Texas. This agreement entails, amongst other things, the initiation of collaborative research projects, exchange of publications, reports and other academic information as well as collaborative professional development. As part of this collaboration, and making use of the opportunity afforded me by visiting Texas for the SEG conference, I here catalogue some of our research projects and some results so far generated. The research projects range from seismic projects through environmental studies and water resources management studies. Also our fears, hopes and wishes will be enunciated to assist in the collaborative effort of the two institutions.
